CARL L. EBNOTHER, M.D.
INTERNAL MEDICINE & CARDIOLOGY
DIRECTOR

January 9, 1980

Dear Friends,

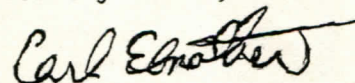

Robert F. Cathcart, M.D. is joining our Staff at The Center For Orthomolecular Medicine. He has been practicing Orthomolecular Medicine and Orthomolecular Surgery at Incline Village, Nevada, the north end of Lake Tahoe for ten years. He has had twelve years experience with Orthomolecular treatments, starting with the use of Vitamin E for leg cramps and then Vitamin C for most viral diseases. His experience with Vitamin C has been over nine years with 9,000 patients. This experience has been on oral, intramuscular, and intravenous use of Vitamin C. More recently, unusually effective treatments for Herpes infections and acne have evolved. The nutritional approach has proved effective in the treatment of most patients with low back or neck pain who have not responded to more conventional treatments. He is especially interested in the Orthomolecular treatments, both in children and adults of:

1. Viral and bacterial diseases
2. Back and neck pain
3. Hypoglycemia
4. Acne

The enclosed newsletter gives additional information about Dr. Cathcart's background from the Linus Pauling Institute of Science and Medicine, which he supports.

We feel honored and privileged that Dr. Cathcart has joined our Staff and we look forward to your sharing his knowledge and expertise in reaching high level optimum health.

Sincerely Yours,

Carl L. Ebnother, M.D.
